RE: REQUEST APPROVAL FOR PAYMENT OF FLEX SENSOR KIT

Overview,

Strength & Conditioning Team have requested the need to procure FLEX Sensor Kit; please note; These items are specialised training equipment for HP and cannot be sourced locally due to pre-order, warranty and other related issues. Specification of this equipment is based on consultation with sports & Coaches. This quote is direct from the manufacturer not a distributor and they have the items in stock right now. We have also found suppliers the closest to Solomon Islands, which is the cheapest for shipment through BJS from Brisbane.

The items we are procuring here are called linear position transducers, which are advanced sports science equipment. They will allow SINIS coaches to closely monitor athletes' training intensity by measuring bar velocity. This will be especially useful for powerlifting and weightlifting, to accurately see performance and fatigue. And then to implement their learnings in developing athletes at the institute in preparation for the Pacific Games. The items we are procuring are relatively cost-effective compared to other manufacturers and easy to use.

Therefore, kindly request for approval of budget and endorsement of this request as they will have significant impact on SINIS.

Way forward;

- Collate the required documents for review and approval.
- Raise payment
